EAST HANDS CONTRACTING EST.

Industrial Shutdown & Maintenance Manpower Specialist
Welding, Fabrication & Mechanical Support for Industrial Facilities

Company Profile outline

- Company Overview & Specialization
- Core Shutdown & Maintenance Services
- Manpower Disciplines & Capabilities
- Project & Industry Experience
- Quality Assurance & HSE Commitment
- Supporting Trading & Industrial Supply

INDUSTRIAL-FOCUSED. SHUTDOWN-READY.
MANPOWER-DRIVEN.

Who We Are

East Hands Contracting is a specialized industrial manpower provider focused on supporting shutdown and maintenance projects within the Oil & Gas and industrial sectors. We supply shutdown-ready, site-experienced manpower, including welding, fabrication, and mechanical support teams, capable of operating efficiently under high-pressure project environments.

Our strength lies in mobilizing qualified personnel who understand plant safety requirements, permit-to-work systems, and the critical timelines associated with shutdown and maintenance activities. By maintaining a clear focus on manpower specialization, we help our clients minimize downtime, maintain operational safety, and execute shutdown scopes with confidence and control.

Our Core Specialization

- **Shutdown & Maintenance Manpower Supply**

Supplying shutdown-ready manpower for planned and unplanned shutdown and maintenance activities, with strong compliance to site safety and permit requirements.

- **Welding & Fabrication Workforce**

Certified welding and fabrication manpower supporting piping, structural, and maintenance-related scopes.

- **Mechanical & Piping Support**

Mechanical and piping teams supporting installation, removal, and maintenance activities during shutdowns.

- **Instrumentation & Electrical Support**

Providing skilled instrumentation and electrical manpower with proven experience in maintenance support activities, including installation, removal, cabling, termination, and routine instrumentation maintenance during shutdowns, in compliance with site procedures and safety requirements.

Disciplines We Provide

- CERTIFIED WELDERS (CARBON STEEL & STAINLESS STEEL)
- PIPE FITTERS
- MECHANICAL TECHNICIANS
- RIGGERS
- FABRICATORS
- GENERAL MAINTENANCE WORKERS
- SITE SUPERVISORS

Selected Clients & Project Experience

East Hands Contracting has supported industrial shutdown and maintenance activities through the supply of qualified manpower across various projects within the Kingdom of Saudi Arabia. Our experience includes shutdowns, turnarounds, and routine maintenance works executed in refinery and industrial environments, in collaboration with main contractors and execution teams. Client references can be provided upon request, subject to confidentiality.

Quality Assurance & HSE Commitment

Quality and safety are fundamental to our manpower delivery. Our personnel are selected based on trade competency, site experience, and familiarity with permit-to-work systems, toolbox talks, and site-specific HSE requirements. We ensure continuous supervision and strict compliance with client procedures to maintain work quality and operational safety.

This commitment is reinforced through regular performance evaluations, ongoing safety awareness, and close coordination with client representatives. By maintaining proactive communication and disciplined execution, we minimize risks, enhance productivity, and ensure uninterrupted project progress. Our systematic approach to manpower management allows us to consistently meet project timelines while upholding the highest standards of quality, safety, and regulatory compliance.

Supporting Trading & Industrial Supply

In addition to our core manpower services, East Hands Contracting provides limited, execution-focused industrial supply to support shutdown and maintenance activities.

Our trading support includes essential welding consumables, basic tools, maintenance materials, and project-specific PPE, supplied in coordination with manpower deployment to ensure smooth execution and reduced site disruption.

All trading activities are strictly supportive in nature and aligned with project requirements, reinforcing our role as an execution partner rather than a general trading provider.

Why Choose East Hands Contracting?

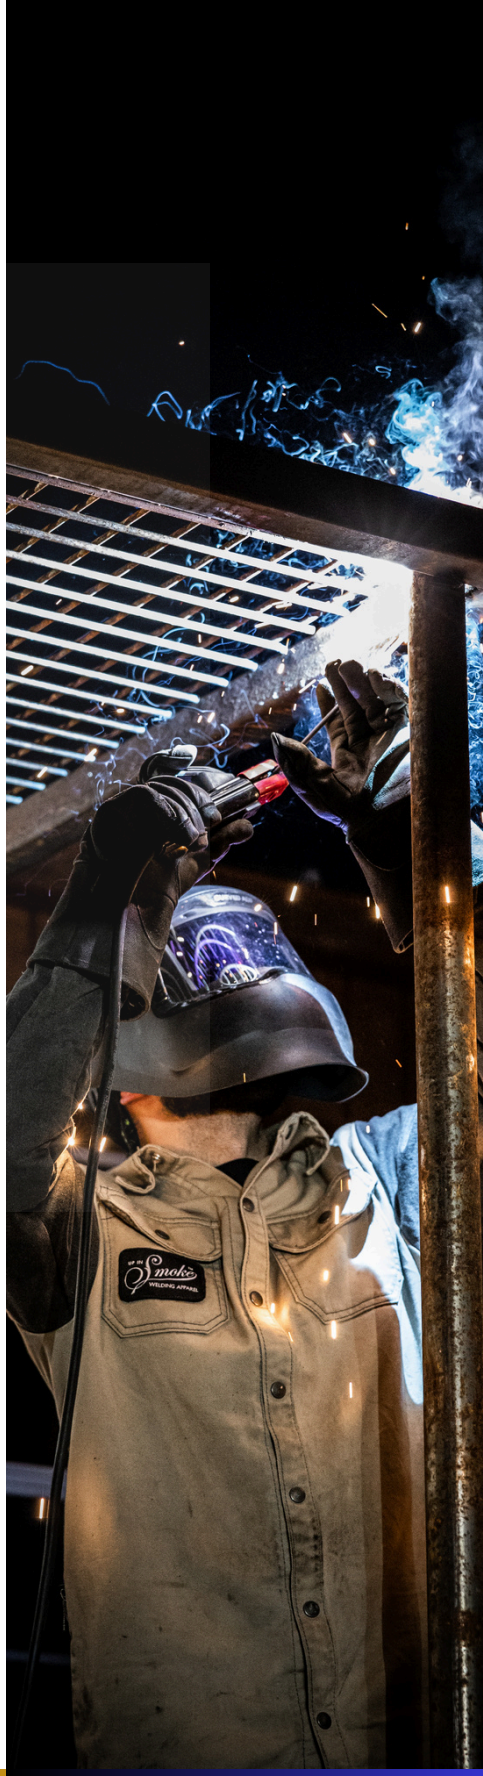

- Specialized focus on industrial shutdown and maintenance manpower
- Shutdown-ready workforce trained to perform under critical site conditions
- Strong alignment with site safety systems, permits, and execution discipline
- Proven experience supporting welding, mechanical, piping, and instrumentation scopes
- Rapid manpower mobilization to meet tight shutdown schedules
- Execution-driven mindset focused on minimizing downtime and protecting asset integrity

Contact Us

When shutdown time matters, you need manpower that is ready, reliable, and proven.

East Hands Contracting delivers shutdown-ready industrial manpower built to perform under pressure. We support critical shutdown and maintenance scopes with skilled teams that understand site discipline, safety requirements, and execution timelines.

With hands-on industrial experience and strong instrumentation and maintenance capability, we help our clients minimize downtime, maintain asset integrity, and keep projects moving without disruption.

Contact East Hands Contracting today — and secure the manpower your shutdown cannot afford to miss.
